

PHYSICAL EDUCATION CONGRESS

India is no more a country of snake charmers, chaos, dirt and violence. Today's India is different. It hopes as never before ! Everyone needs to change drastically and without hope for future there can neither be joy in present nor creative action. For hope, joy and plenty of action let's make Sports a way of life...

The Battle of Waterloo was won from the playfields of 'Eton' is what lord wellington said after winning over world conqueror Napoleon. These words carry the same weight even today

Great sporting nations are also booming economies. When economy is booming can raising a toast to it, be far behind. One may not buy this idea after technical shifts in global economy in 2008, but for several decades, the countries that have played well have also faired well.

Sport's is fun. It's a place where adrenaline is always pumping, even if you are not in the field, shout till your throat aches, jump till you drop dead, swing, sway and dance, it's a place to be at any game.

Life is a game for growth, play together, and grow together.

Sport is a great inspirator / motivator. It is the people who play and excel, know what it takes to reach there, the build-up, hardships, hair raising encounters, failures, hopes, joys and plenty of actions.

Physical Education Congress (PEC) is a voluntary organization, which is focused and committed to the cause of making this happen. Ours is a force of, strong, dedicated, devoted and committed professionals in the most exciting field of Physical Education and Sports. We do not know what technologies and platform will be available to work on in the next decade, but what we surely know, is that India will have youngest workforce across the globe !! And we also know the basic skills required for that workforce will be Successful learners, Confident Individual and Responsible Citizens / Netizens.

And that is what we believe at PEC that a BALL can change the world. It can be the biggest teacher. Our ambitions for 2020 or 2050 is same, we need great team players and brilliant heads which other domain /discipline can boast of creating these qualities other than Physical Education and Sports.

Our report card as on mid-2011 says we have conducted 44 workshops across India, covering 2300+ teachers from various categories of schools i.e. Public Schools, Private Schools, Govt. Schools, Govt Aided Schools, GHPH Schools, Kendriya Vidyalayas and Army Schools. Our members and organisation have worked closely with following cooperates/organisation British Council, CBSE , UNICEF, EDUCOMP, Coca Cola, PARLEs, Bharti Foundation, Nestle, Bausch Lomb.

We at PEC have some tailor made programs, which if implemented in letter n spirit can yield noteworthy results. PEC can reach n number of schools, colleges, universities, corporate and communities in CNEWS of India. Our efforts have always been lauded by both print and visual media. We have an effective support from them.

Mantra we believe...Fit People Fit Nation !

Mukesh Kohli
